

Mohammad Adnan Ali

Data Analyst | Fresher | CSE 2026

+91 8008197785 • adnanalimd0312@gmail.com • Karimnagar, Telangana • git hub: [ [adnanali712 - Overview](#)]

OBJECTIVE

Final-year CSE student skilled in Python, SQL, Excel, and data visualization, seeking a Data Analyst role to apply hands-on data handling, analysis, and reporting skills gained through academic projects and internship experience.

EDUCATION

BTech – Computer Science & Engineering

Jyothishmathi Institute of Technology & Science | CGPA: 8.2 | Graduating: 2026

- Relevant Coursework: Python Programming, Data Structures, DBMS, Statistics, Data Visualization

TECHNICAL SKILLS

Languages & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, MS Excel, Power BI, Tableau

Concepts: Exploratory Data Analysis (EDA), Data Cleaning, Statistical Analysis, Dashboard Reporting

Soft Skills: Teamwork, Communication, Problem-solving, Attention to detail

INTERNSHIP

Data Analytics Intern | Cognifyz

- Performed data cleaning and preprocessing on real-world datasets using Python (Pandas) and MS Excel.
- Conducted exploratory data analysis to identify patterns, outliers, and trends.
- Generated analytical reports and visualizations to present findings to stakeholders.
- Completed the internship with merit and received a performance certificate.

Data Analytics Intern | Labmentix

- Performed data cleaning and preprocessing on real-world datasets using Python (Pandas) and MS Excel.
- Generated reports and created innovative dashboards
- Completed the internship with merit and received a loa & performance certificate.

PROJECTS

Retail Sales Dashboard *Power BI*

- Built an interactive sales dashboard tracking revenue, regional performance, and monthly KPIs.
- Enabled data-driven decisions by automating report updates with Power Query.

Bike Buyers Dashboard Analysis

- Excel-based Data Analytics Dashboard created to analyze customer demographics and purchasing behavior to bike purchases.

The project demonstrates skills in:

- Data Cleaning
- Data Analysis
- Pivot Tables
- Dashboard Design
- Business Insight Generation
- Data Visualization in Excel

Retail Sales SQL Project

- SQL-based Retail Sales Analysis project created using MySQL. The project focuses on data exploration, cleaning, and business analysis using SQL queries.
- The dataset contains retail transaction details such as customer information, product categories, quantity sold, pricing, and total sales. Using SQL queries, different business insights are generated to understand customer behavior, sales performance, and category trends.

Airline Flights Data Analysis Project (python)

- This project focuses on analyzing airline flight data using Python for Data Analysis (DA). The main goal of the project is to clean, explore, and visualize airline flight data to discover useful insights such as airline frequency, departure trends, arrival trends, and overall flight patterns.
- The project was completed using Jupyter Notebook and popular Python libraries like Pandas, NumPy, Matplotlib, and Seaborn.

Library Management System – SQL Project

- This project is a **Library Management System** developed using SQL. It demonstrates database design, table creation, relationships using foreign keys, and basic to intermediate SQL operations such as INSERT, UPDATE, DELETE, JOIN, GROUP BY, and aggregate functions.
- The system manages:
 - Library branches
 - Employees
 - Books
 - Members
 - Issued books
 - Returned books

CERTIFICATIONS

- Cognifyz Data Analytics Internship Certificate
- Labmentix Data Analytics loa & internship Certificate
- Python Basics – HackerRank
- UDEMY course completion Certificate
- SQL bootcamp Certificate
